Description

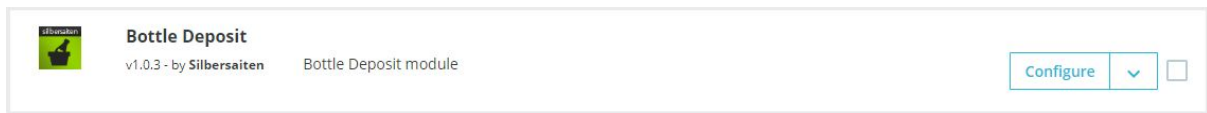

The module bottle deposit is suitable for the online sale of products with deposit. It adds the deposit value to the shopping basket with the corresponding products.

Installation

To install the module, go to Modules and Services > Modules and Services. Click on the button "Add new module".

Select the zip.-file of the module and click on "Upload this module".
After the module is uploaded and installed, it appears in your modules list.

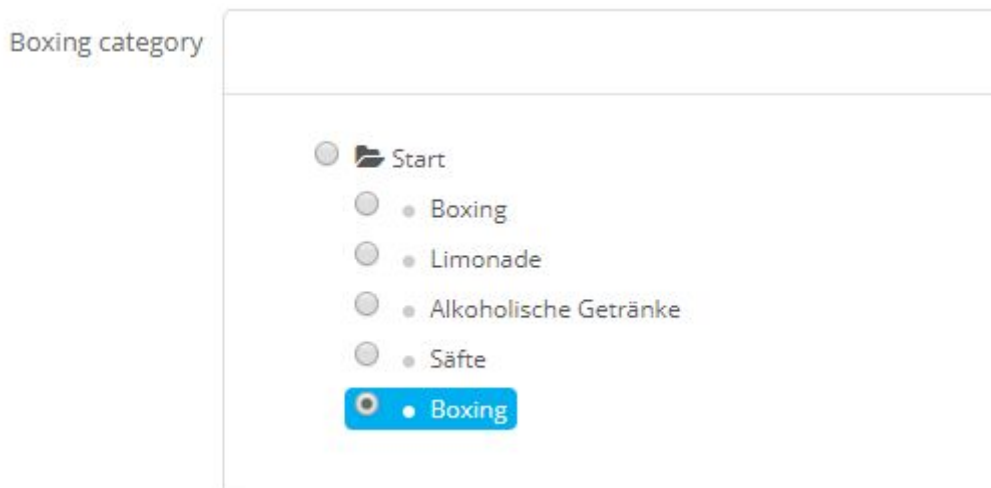

Functions

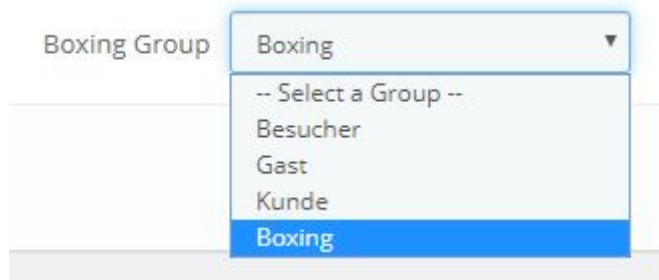

Click on the button "Configure" to configure the module.

In the settings, select the category in which you create the individual deposit options. It is best to first create your own boxing category.

Now select the boxing group. You should first create your own group for the deposit.

Click on "Save Settings".

Create Deposit

Now you can create products for the deposits. Assign these products to the boxing category.

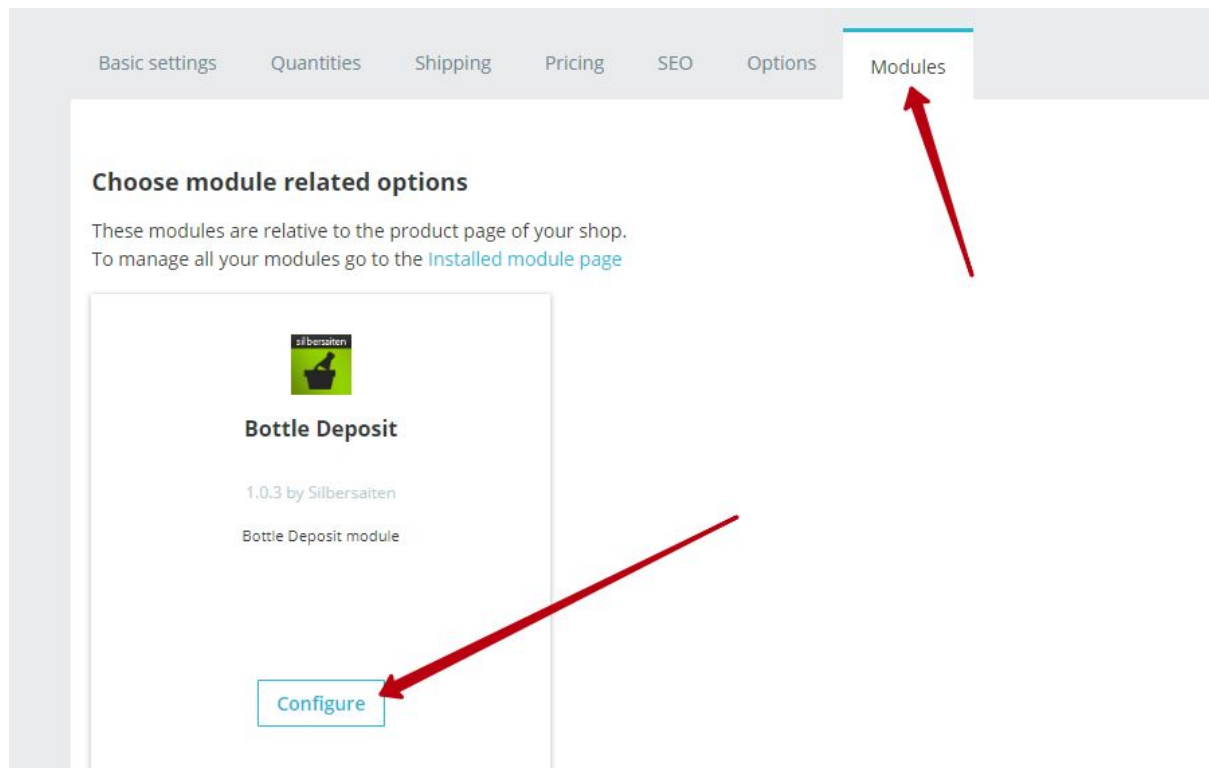

ID	Image	Name	Reference	Category	Price (tax excl.)	Quantity	Status	Actions
Min Max		Search name	Search ref.	Search category	Min Max	Min Max		Q Search
☐ 16		copy of deposit		Boxing	€0.21	0	✗	 
☐ 15		deposit		Boxing	€0.21	999	✓	 

Assign deposit to product

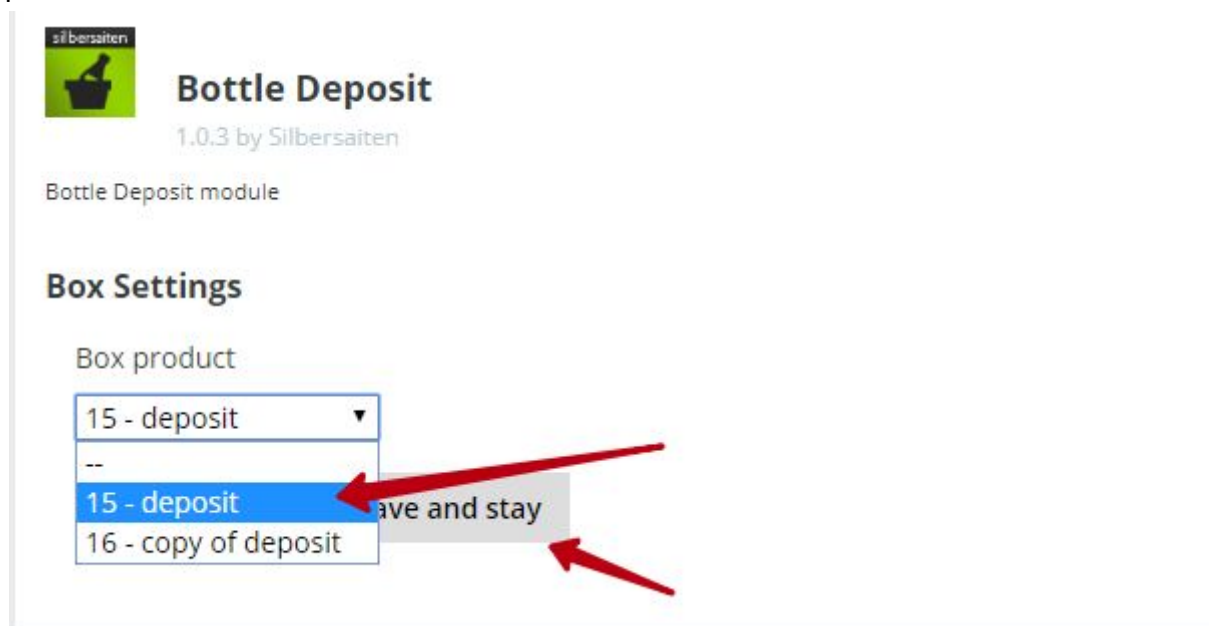

Select a product to which you want to assign a deposit.

Click on the tab "Modules".

Click on the button "Configure" in the bottle deposit module.

Choose one of your deposits and save the settings. The deposit is now assigned to your product.

Frontend

If your customer adds a product with assigned deposit, the deposit is added to the shoppingcart, too. Any changes to the number of products will automatically be transferred to the deposit.
