

# DHL Connector

## Description

With the DHL Intraship Connector you can manage all of your DHL shipments and generate labels and retour labels directly from the PrestaShop Back Office. Various functions are available for orders in Germany, within the EU and outside the EU. The module allows worldwide shipping from Germany and Austria.

### Important!

**In the middle of 2017, all versions under version 2.0 will be shut down and are therefore no longer compatible with Intraship customers. It will require access to the DHL business customer portal.**

**A quick change of the module to version 2.0 is required. Furthermore, some functions are only available for version 2.x.**

## Installation

After the module is downloaded and installed it can be found in your list of modules: Module.

## Authentication

You require access to the DHL [business customer portal](#) and you must be authorized to ship via the business customer portal.

To unblock the shipping process for you, please contact your DHL customer adviser. The possibility to generate [return label](#) also have to be unlocked. You will need separate access data. Please contact your DHL Customer Adviser.

### Settings to be made directly in the DHL business customer portal

#### Format of shipping labels

You can set the format of the shipping labels in your customer account under **Ship> Ship> Basic Settings> General**.

## General Settings

You can set general preferences, e.g. for printing your shipping labels.

[Help](#)

Current User Group

STANDARD\_GRUPPENPROFIL

### Parameters for the transfer of recipient addresses

- Automatic saving
- Save upon request
- No saving

### Cursor starts in registration of shipments

- Starts with cursor in shipment reference field [?](#)

### Set-up of printer

The printer settings need to be adjusted.

Shipping label	Printer: Adobe PDF	Print format	Common label laser printing 105 x 205 mm (9) <a href="#">v</a>
Return shipping label	Printer: Adobe PDF	Print format	Common label laser printing 105 x 205 mm (9) <a href="#">v</a>
	<input checked="" type="checkbox"/> Print combined with Shipping label <a href="#">?</a>		
Customs content declaration	Printer: Adobe PDF	Print format	Laser Printing A4 plain paper
International payment form	Printer: Adobe PDF	Print format	Laser Printing A4 plain paper
	<input checked="" type="checkbox"/> Print combined with Customs content declaration <a href="#">?</a>		
Shipping list	Printer: Adobe PDF	Print format	Laser Printing A4 plain paper

### Print by Reference Settings

Would you like to be able to specify the number of shipping labels on the page for Print by Reference for every shipment about to be printed?.

- Show input field for the number of shipping labels for every request to print by reference.

Would you like to print shipments with missing routing codes immediately when using Search by Reference in "Dispatch Handling → Print by Reference"?

- Print shipments regardless of missing Routing Codes.

[Close](#)

[Save](#)

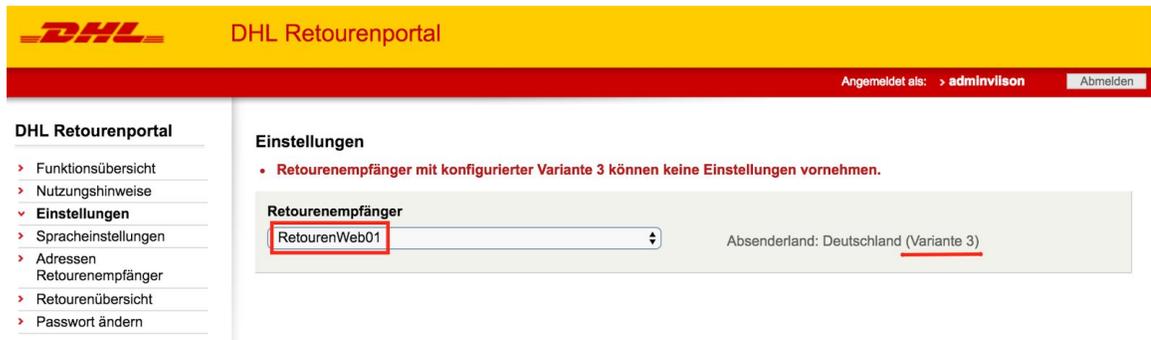

## Return portal:

The return portal must be activated for you before use (see Authentication). After the return portal has been activated for you, the following steps must be carried out in the DHL Return Portal:

### Return Portal:

- Access data for your return account: To log in to the return portal, enter the user name you received from DHL for the return portal under the option password forgotten. The access data will be sent to you by e-mail.
- Enter password for web service access: In the confirmation e-mail from DHL another link was sent to you, under which you can assign a password for web service access. This password will be used later as "online return password".
- Portal-Id: In the e-mail from DHL, which confirms the establishment of the return portal, you will find the online return portal ID as "portalId".

- Settings of your DHL return portal: The initial configuration is described in the return portal under the menu item "Usage notes". Follow the steps given there to enable your portal to be used.
- Retourenempfänger Germany & Other countries: DHL assigns individual "return recipients" (portal names) for each customer and each sender country. You can find the "return recipients" available to you in the "Return Recipients" selection box in the DHL Return Portal under the "Settings" menu item.

In order to activate the return portals of the individual countries, the "return recipient address" must be stored in the DHL business customer portal under "Addresses return recipients" for the corresponding return recipients.

## Functions of the module

Click on "Settings" to make settings for the module.

The user name and signature are your access data to the business customer portal. Please note that the DHL API understands only lowercase letters. If your user name contains uppercase letters, please write them down. If your input is not saved, even though you have made the entry correctly, it can be the length of the user name. If the user name is too long, PrestaShop can not save the settings.

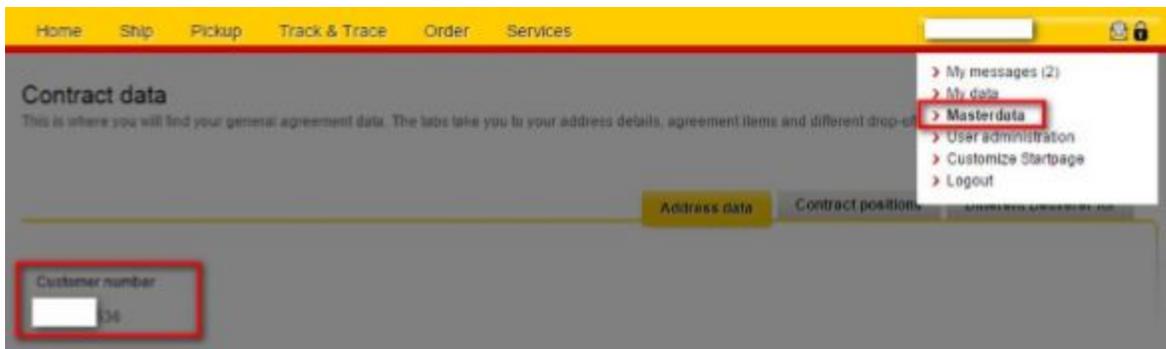

Mode  Live  
 Sandbox  
*Select "Sandbox" for testing*

\* Username   
*"Live" username for user authentication for business customer shipping API*

\* Signature   
*"Live" signature for user authentication for business customer shipping API*

\* EKP   
*"Live" DHL customer number*

Please enter your DHL customer number. You will find this in your customer account in the section masterdata.

The module must be linked to an already created carrier. To do so, select a carrier or create a new one.

Carriers

- dhlintraship
- My carrier
- UPS
- ups for upsservice

New carrier

*If you do not have a carrier*

Set the product and the participation number.

DHL Products

Product	Participation	GoGreen	Action
<input type="text" value="DHL Paket"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Add"/>
DHL Paket	01	gogreen	<input type="button" value="Remove"/>
DHL Kurier Taggleich	01		<input type="button" value="Remove"/>
DHL Paket International	01		<input type="button" value="Remove"/>

The last two digits of the account number are considered the number of participants. You can also find these under your masterdata under the tab Contract positions. The number of participants can differ between the various DHL services (package, package international, Europaket).

### Contract data

This is where you will find your general agreement data. The tabs take you to your address details, agreement items and different drop-off personnel.

Billing number / Product	Identifier / License Plate	Posting text	Payment type	Bank account	Different deliverer
<input type="text" value="01"/> DHL Paket	<input type="text"/>	PARTNERSOFTWARE			<input type="button" value="Edit"/>
<input type="text" value="01"/> DHL Paket International	<input type="text"/>	PARTNERSOFTWARE			<input type="button" value="Edit"/>
<input type="text" value="01"/> DHL Europaket	<input type="text"/>	PARTNERSOFTWARE			<input type="button" value="Edit"/>

In addition, you must enter the number of participants for the return of parcels. This is set to 01 by default. If the last 2 digits of your number in your DHL customer account differ, you must enter it in the box.

Participation number for return shipment account number

*Max. 2 digits. 01 by default.*

In the "Additional settings" field, you can find additional settings.

- Enable calculating weight of package: The module calculates the weight of the product with the weight of the package and gives you the weight of the complete package.

- Rate of converting shop weight unit in kg.: Enter the ratio of the weight unit used by you in the shop to the weight unit kg. If you use the shop gram, enter 0,001.
- Select default age for age checking: You can set a default age control (16+ or 18+). That makes sense if you sell in your shop mostly or exclusively products that require age control.
- Enable DHL Postfiliales and DHL Packstations: Enable this option to allow your customers to deliver your order to a Packet or Post Office.
- Google Map API-key: For more information about the Google Map API keys and how to apply for an API key, please click [here](#).
- Enable updating order status: If you activate this option, the shipping status is automatically changed to the status you have selected (for example, order sent) as soon as you print the shipping label for the purchase order.
- Enable generate label with return label: If you activate this option, a return label is automatically printed with the shipping label. Your customers will be able to return packages to you without any further contact with you by using the enclosed return label.

In the Address box, type your shop address. The module is from version 2.x suitable for shops in Germany and Austria, for versions under 2, only shops in Germany are supported.

Enter your bank details in the "Bank details" field.

Account owner   
*Max. 30 characters*

Bank name   
*Max. 30 characters*

IBAN   
*Max. 34 characters*

BIC

- Click Additional Services to open a drop-down menu with various options for that particular order. The available options can depend on the corresponding delivery service (Germany, EU-inner country, EU-foreign countries).
- Visual age check: An age check (16+ or 18+ years) is carried out during parcel delivery. Additional costs may apply.
- Cash on delivery: This is also paid for the parcel delivery. Additional costs may apply. When you choose this option, you have the option of requesting additional payment from the customer for the possibility of cash on delivery.
- Additional insurance: Packages exceeding the 500 Euro liability limit can be insured by supplementary insurance. Additional costs may apply. When you choose this option, you have the option of receiving additional payment from the customer in compensation for the additional insurance costs.
- GoGreen: For additional costs you can send the packages via "GoGreen". It is ensured that the CO2 emissions caused by the shipment are compensated.

<p>Service for package return <input type="checkbox"/></p> <p><i>After the delivery of DHL Parcel same day, we provide the return of your reusable parcel at your return address. ---	--

## Customs duty

For orders sent worldwide outside the EU, there is also the "Export Documents" drop-down menu.

This menu is intended for the detection of customs.

Fill it in with the appropriate data for customs.

EXPORT DOCUMENTS

Invoice number

\*Export type OTHER

\*Description of export type

0 / 256

Terms of trade

\*Place of commital

\*Additional custom fees  euro

Permit number

Attestation number

Electronic export notification

*Description	*Country code origin	*Customs tariff number	*Amount	*Net weight	*Customs value
Blouse - Size : S, Color : Black	DE	<input type="text"/>	1	1.500000	0.00

Then click Generate label and an export document is created together with the shipping label. This can also be attached to the package to indicate the customs value and type of content. This facilitates the customs clearance of parcels.

After you have made all settings, click Generate labels or PRINT LAST LABELS.

### Error messages:

When generating the labels error messages may occur.

Order #43 : Die angegebene Breite ist zu groß.

Order #43 : There area errors on the form

These errors relate in most cases the address. The erroneous orders outlined in red. Click in the affected orders to "update delivery address".

2017-08-29  
yyyy-mm-dd

DELIVERY ADDRESS	DHL RECEIVER ADDRESS
Company First name Mustermann Last name Max Address Musterstr. 20 Address (line 2) Zip/Postal Code 90420 City Nürnberg Country Deutschland State Home phone +49154787885 Mobile phone	* Name / Company Mustermann Max Communication person * Communication e-mail danutz.mladin@gmail.cc * Communication phone +49154787885 Communication mobile Address type <input checked="" type="radio"/> Regular <input type="radio"/> Packstation <input type="radio"/> Postfiliale * Street name Musterstr. * House number 20 Care of name Floor number Room number * Zip 90420 * Country ISO code DE State * City Nürnberg District of city

The most common problem is that the road and the house number are set in a field as they are requested by DHL in individual fields. Insert the house number manually in the appropriate field.

After successful creation of labels, you get reports of success.

Creating labels for individual orders works in the same way. Just click only on the desired order.

After you create the labels you can print it.

After the first label is generated for an order the tracking number will be shown and also sent to the customer.

Also there is possibility to generate more labels, retour label. Furthermore labels can be deleted.

The retour label will be sent to your customer via email. Depending on the settings, your customer can autonomously generate a return receipt, without any further action on your part.
