

Hermes Shipping Interface Connector

Description

With the module you create your shipping labels for Hermes ProfiPaketService directly from the Backoffice of your Prestashops. Choose packet size, generate labels, print - ready. You can generate and print as many labels per order as you want to.

Setting up Hermes

In order to use Hermes via the plug-in, you need a contract with Hermes Germany GmbH. For this purpose, please contact the sales department at vertrieb-paket@hermesworld.com or 040 5375 7400. If you already benefit from our services and are a Hermes customer, please contact your contact person.

You will then receive your access data, which will allow you to use the Hermes plug-in for prestashop.

You can control the shipment from your prestashop backend.

Installation

After you have downloaded and installed the module, it appears in your modules list in the tab **Module**.

Functions

Click on "Configure".

Set the settings in the "General settings" menu.

Enter your username and password, which will be sent to you through your Hermes account.

Under Shipping Services, you can assign different shipping options to your shipping services from Hermes shipping. For example, Hermes offers the shipping option that orders are delivered on the desired day at the desired time. A further possible shipping option would be the express delivery. Assign the options to your existing shipping services, or create new shipping services. Make sure that these options apply only to your created shipping services that ship with Hermes.

You can also make settings for the order reference.

Carriers

Carrier	Hermes package
Hermes Standard Versand	Standart delivery service ▼
Hermes Express Versand	Next time delivery service ▼
Wunschzeit Zustellung	Desired day and desired time delivery service ▼

Please select Hermes package for carrier. If you leave it empty then it this carrier will not be assigned to Hermes service

Reference number in label is Order reference
 Order ID

If you want to allow your customers to deliver your orders to package stores, you must enter valid data in the appropriate fields that qualify you to use the package shop finder.

PACKAGE SHOP FINDER SETTINGS

Please fill valid Consumer name and valid Consumer password for using Package Shop Finder service. If these fields are empty, the

Consumer name

Consumer password

Define the payment option used for COD delivery, e.g. Cash on delivery.

COD SETTINGS

Please select payment(s) of COD. COD option of shipment will filled automatically if payment method of order is one of selected payments.

- Cash on delivery (COD)
- Heidelpay
- Payments by check
- Wire payment

- Under "Miscellaneous Settings", specify the medium to inform your customers of a shipment. You can notify your customers via e-mail and SMS. The notifications are only sent for orders that have either the shipping option "WunschPaketshop Service" or "COD" selected.
- You can activate automatic weight calculation based on the article weight.
- You can enable automatic update of the order status. After the creation of a Hermes label, the order status is automatically changed to "Order shipped" or "Order shipped".

MISCELLANEOUS SETTINGS

Enable notification service by default

E-Mail

If you select SMS or E-mail, then alert service type will be selected on form of creating shipment mobile phone number of delivery address. You can change alert service type, email and phone or cash on delivery service.

Enable calculating weight of package

YES

NO

Enable calculating weight of package in according with weight of products in order

Rate of converting shop weight unit in kg. Current shop weight unit is kg

1000

Rate of converting shop weight unit in g (gramm). If shop weight unit is gramm(g), then rate is empty then weight will not be recalculated.

Enable updating order status

-- Do not change --

Order status will be changed "Shipped" automatically after creating Hermes label

Save your settings.

Processing of orders

Go to the Order Settings> Order Settings menu. Go to an order that has chosen a Hermes shipping type. In this order there is a box "Hermes Delivery Labels". Here you can produce the address labels.

Specify the shipping class and the weight of the package, and click "Generate Label".

The screenshot shows the "HERMES DELIVERY LABELS" form. It is divided into three sections: "Carrier / Package", "Parameters", and "Actions". Under "Carrier / Package", the text "Hermes Standard Versand / Standard delivery service" is displayed. The "Parameters" section includes a "Class" dropdown menu set to "XS", a "Weight" input field with "0" and "g", and three dimension input fields: "Height" (0 mm), "Width" (0 mm), and "Depth" (0 mm). The "Actions" section contains a green "Generate label" button, a "Update delivery address" button, and an "Additional services" button.

You can also select some special options for shipping under the "Additional service" tab.

The screenshot shows the "ADDITIONAL SERVICES" form. At the top right, there are two buttons: "Update delivery address" and "Additional services", with the latter highlighted by a red box. The form contains several fields and checkboxes: "Day of delivery" (text input with "yyyy-mm-dd" placeholder), "Next day delivery service" (checkbox), "COD" (input field with "26.67" and a "Euro" dropdown), "Bulky goods" (checkbox), "Exclusion of neighborhood delivery" (checkbox), "Type of notification" (dropdown menu set to "E-Mail"), "*E-mail address for e-mail notification" (text input), "ID of parcel shop (WunschPaketshop)" (text input with a note: "Parcel shop (WunschPaketshop) where you want to deliver parcel"), "*Firstname of receiver in parcel shop" (text input), "*Lastname of receiver in parcel shop" (text input), "Type of document for IdentService" (dropdown menu), and "ID of document for IdentService" (text input).

Alternatively, you can generate the labels directly for several orders at the same time. To do this, go to the order overview, select the appropriate orders and click on "Generate Hermes Labels".

The module adds two new subcategories to your back-end.

The Hermes "Hermes Shipment Orders" menu displays an overview of all orders Hermes chose as the shipping method for your order.

In the "Hermes Pickup Orders" menu, you will find an overview of all orders that are delivered to a packing station and picked up by your customers.

When printing out the label, a printable PDF Document is generated. It might look like this, depending on your package settings:
