Description

With the Kaufland Module, you can synchronize the stock of the PrestaShop BackOffice directly with the Kaufland.de volume and import the orders from Kaufland.de into Prestashop.

Installation

To install the module, go to Modules and Services> Modules and Services. Click on the button "Add new module".

Add a new module

Select the zip.-file of the module and click on "Upload this module". After the module is uploaded and installed, it appears in your modules list.

Settings

To access the settings of the module, click on Configure in the module or click on "Kaufland" in your menu.

At the top bar you will see a menu in which you can call up the various setting options.

Information

Under the "Information" tab, you can create an account for the Kaufland Marketplace Connector. Click on the button "Become a merchant". Alternatively, you can register directly at <https://www.kaufland.de/haendler-infobereich/>

- Thousands of discounted products
- Over 2,6 Mio satisfied customers
- Pay by Invoice and in rates for new customers
- Safe ordering process

Settings

Global

Enter your client key and secret key in the tab "Settings -> Global". The key can be found in your kaufland.de account (Client Key and Secret Key).

In addition, specify the default settings of your products (delivery time, condition, etc.).

Order States

Under the settings, you can find further settings for the order status. Specify the status with which the orders are to be marked when you import them from Kaufland. For

example, orders that are marked Kauflandon "Sent" and are now imported to you will appear with a certain status in your shop, which you can select here.

SETTINGS	PRODUCTS	ORDERS	TICKETS	FEEDS	REPORTS	INFORMATION
GLOBAL	ORDER STATES	CARRIER	CATEGORIES	WAREHOUSES	SHIPPING GROUPS	CRON
<p> ORDER STATES</p>						
"Need to be sent" Order State		<input type="text" value="Canceled"/>		<p><i>This order status will be assigned to all orders that are listed as "N</i></p>		
"Sent" Order State		<input type="text" value="Delivered"/>		<p><i>This order status will be assigned to all orders that are listed as "s the customer.</i></p>		
"Received" Order State		<input type="text" value="Awaiting check payment"/>		<p><i>This order status will be assigned to all orders that are listed as "r</i></p>		
"Cancelled" Order State		<input type="text" value="On backorder (paid)"/>		<p><i>This order status will be assigned to all orders that are listed as "c</i></p>		
"Sent and autopaid" Order State		<input type="text" value="Awaiting Cash On Delivery validation"/>		<p><i>This order status will be assigned to all orders that are listed as "s</i></p>		
"Returned" Order State		<input type="text" value="Payment accepted"/>		<p><i>This order status will be assigned to all orders that are listed as "r</i></p>		

Carrier

Assign a carrier and a standard carrier code. The carrier will be used by default for the orders placed on Kaufland.

GLOBAL	ORDER STATES	CARRIER	CATEGORIES	WAREHOUSES	CRON
<p> CARRIER</p>					
Carrier		<input type="text" value="My carrier"/>		<p><i>Please assign prestashop carrier</i></p>	
Default carrier code on real		<input type="text" value="Other"/>		<p><i>Please assign default carrier code for making orders as sent on Real. Y be changed on Real</i></p>	

Categories

On the menu, click Categories to assign specific categories from your store to the categories at Kaufland. On the left side are your categories, on the right the search bar for categories from kaufland. This is necessary if your articles are not available at kaufland.de, new or only sold by you at kaufland.de. Otherwise the articles are assigned automatically by EAN.

Select one of your categories on the left and start typing the name of the kaufland category in the search bar on the right. You'll now see suggestions of kaufland categories that match your input.

Due to the amount of available kauflandcategories, it is not possible to display the categories without input.

Now select the desired kaufland category to which your category should be assigned.

On the bottom left you can see an overview of the previously assigned categories. To the right you will find an overview of the attributes of this category.

You can assign Attributes to the individual categories. To do this, use the drop-down menus under "Linkable Attributes" and click on the save icon next to the corresponding attribute.

Warehouses

Under warehouses you can enter the warehouses of your shop. Click on the + sign.

Fill in the address. You can also specify whether orders can be picked up at this warehouse.

Name

Street

House no.

Postcode

City

Default Warehouse?

Cron

You can enter a secure key here so that a regular automatic update of the synchronization between Kaufland and your shop takes place (stock, prices, orders). As a result, you do not have to manually synchronize your shop with Kaufland every time.

CRON

Secure key

? A cron job for updating stocks and prices and importing orders automatically should be added.

For this purposes, "Cron tasks manager" prestashop module or cronjob section of hosting panel or Unix crontab file can be used.

1. With Prestashop Cron Task Manager
2. With a server Customer Panel
3. With a Unix Crontab file on your server

This cron job will run every night at 1:00am.

```
0 1 * * * php -f /var/www/silber/htdocs/htdocs/_demo/modules/rakuten/modules/real/cron_update.php secure_key=test
0 1 * * * php -f /var/www/silber/htdocs/htdocs/_demo/modules/rakuten/modules/real/cron_createorders.php secure_key=test
```

Products

Full export

You have the possibility to select which products you want to export. You can either go by manufacturer or by category. Select the categories or manufacturers from which the products are to be exported.

Export Type

Select the type of export you want to use for your products.

Categories to export products from

- Start (1 selected)
- Women
- Neue Kategorie
- Kategorie test 2
- Spielzeug
- Universalpfannen
- Schuhe

- Specify the language in which the products are to be exported.
- Define in which currency the products are to be exported.
- In the product name template, specify the label with which the products should appear at Kaufland. For example, you can specify the manufacturer as well as the product name. It may be that the final product names are displayed slightly differently from Kaufland.
- Select the image type with which the products are to be exported.

Export Language

Select the language you want your products to be exported in.

Export Language

Select "euro" currency here. Create one in your store if you haven't yet.

Product Name Template

? Use variables to set up your product name template:

Variable	Contents
{product}	Product Name
{category}	Category Name
{manufacturer}	Manufacturer Name
{attributes}	Attribute list

If you leave this field empty, only the product name will be displayed. Note that Real processes product feeds m exactly as you have set.

Image type

Product images will be exported with the selected image type.

- Specify whether and which attributes should be exported together with the products.
- You can enter a product price modifier that will affect all exported products (for example, all exported products may be 5% more expensive than in your store)
- Define whether the product price update should be made from your shop or manually.
- Define whether the product stock update should be made from your shop or manually.

Attribute Export Type

Select the type of export you want to use for your products.

Product price modifier

Change price (-10%, +2.4, e.t.c.)

Type of product price update

Please select type of product price update

Type of product stock update

Please select type of product stock update

After you have saved your settings, you can have your selected products checked in the lower field.

Finally, click "Export" to export the products.

EXPORT

Click "export" below to attempt to export your products. In case any errors occur, you will be prompted to fix them. Please do not close this window until you get a response.

Check Products Export

Products

In the menu you will find a section Products -> Products. While you can only export products by category or manufacturer and only set general settings that apply to all products in the section "Full Export", you can export and edit individual products under Products -> Products.

ID ▲	Comment ▼▲	Count ▼▲	Price ▼▲	Warehouse ▼▲	Delivery Time ▼▲	Condition ▼▲	
	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	- ▼	- ▼	<input type="text" value="Q Search"/>
1		13	1 000,00 €		Ships within 24 hours	New	Edit ▼
2		20	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
3		13	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
4		1000	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
5		1000	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
6		1000	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
7		1	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
8		1000	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼
9		1000	1 000,00 €	Main Warehouse	Ships in 1-3 days	New	Edit ▼

You can, for example, edit the status, the attributes, or the delivery time for individual products.

*

Condition ▼

Select the condition of the item, e.g., new or used

A note about the item for the customer. For example, if it is delivered by delivery service and

When you are done with editing the individual products, click on "Export".

EXPORT

You may export your units now. The units that are already exported will be updated.

Synchronization

In the "Sync" tab, you have the option to synchronize your stocks and prices with Kaufland. This function is especially important if you have not created a cronjob that performs the synchronization automatically.

FULL EXPORT PRODUCTS **SYNCHRONIZATION**

UPDATE STOCKS AND PRICES

You have no units to export. You may export your products first - units will be created automatically then. Or you can add units manually in the list above.

Click "export" below to attempt to export your units. In case any errors occur, you will be prompted to fix them. Please do not close this window until you get a response.

Orders

In addition to exporting products, you can also import orders placed for your products on Kaufland Marketplace.

To do this, go to the tab "Orders".

In the lower part you will find the button "Import". Click Import to import the orders.

IMPORT ORDERS

This mechanism will attempt to retrieve all the orders placed on Real and add them to your PrestaShop installation. Note that all the products in those orders must be linked to corresponding products in your PrestaShop, otherwise the order can't be imported.

Then you will find the imported orders at the top.

ORDERS

ID	Imported	Delivery	Customer	Count units / Total	Shipping	Invoice type/ Invoice number	Status	Date
<input type="checkbox"/>	(0)	Deutschland		2 2,00 €	5,30 €		Sent and autopaid	12/19/2016 16:49:06
<input type="checkbox"/>	(0)	Deutschland		2 2,00 €	5,30 €		Need to be sent	12/19/2016 13:06:45
<input type="checkbox"/>	(0)	Deutschland		1 3,00 €	4,30 €		Cancelled	12/14/2016 13:19:48

Bulk Actions ▾

Tickets

In the tab "Tickets" you can see an overview of the tickets received via Kaufland. This list is only an indication that there are open or new tickets. The answer and the progress of the tickets must be handled directly under Kaufland.

Feeds

Feeds allow you to see an overview of the feeds of your products as well as the feeds of the units.
