1. The product

Use

The Multiple Feature modul is versatile.

You can use it to define and categorize your Products.

It allows your customers to navigate easily through your products and to reach their requests fast.

Example

For example you can use it to categorize your jewellery concerning their material and size or your games concerning the foreseen age of the children.

2. Installation

First of all go to the section „modules“ at the back office and click **“Add a module from my computer”** to upload the zipped module. After the installation you will find it listed **“Front Office Features”**

You will find the feature manager core module in the back office at the section **“Catalog” > “Features”**.

At this point, you have the option of importing your article properties into a CSV file instead of creating them one at a time.

IMPORT

File: Keine ausgewählt
File...

Override:
override existing features

Delimiter:
Parameter sets the field delimiter (default ;)

Enclosure:
Parameter sets the field enclosure (default ")

Delim1:
(default ;)

Delim2:

3. Functions

Add a new Feature

Features interface will help you easily add new or edit existing feature. Click on the button **"Add new"**.

Type a name for your new feature and note the invalid character.
Make sure that the first language has a value for the Multiple Feature and save your feature.

*** Name** en ▼

URL en ▼
When the Layered Navigation Block module is enabled, you can get more detailed URLs by choosing the word that best represent this feature. By default, PrestaShop uses the feature's name, but you can change that setting using this field.

Meta title en ▼
When the Layered Navigation Block module is enabled, you can get more detailed page titles by choosing the word that best represent this feature. By default, PrestaShop uses the feature's name, but you can change that setting using this field.

Indexable YES NO
Use this attribute in URL generated by the layered navigation module.

Add new feature values

Now you can add a value to the created feature.
Click on the button **“Add new feature value”**.

Add new feature value

Select a name for the value and assign the value to the feature.
You can choose to save your value and add another value (**Save and add another value**) or to simply save it (**Save**).

You can create as many values as needed.

* Feature

* Value

URL

When the Layered Navigation Block module is enabled, you can get more detailed URLs by choosing the word that best represent this feature's value. By default, PrestaShop uses the value's name, but you can change that setting using this field.

Meta title

When the Layered Navigation Block module is enabled, you can get more detailed page titles by choosing the word that best represent this feature's value. By default, PrestaShop uses the value's name, but you can change that setting using this field.

Assignment of the value to your product

Select the product to which you want to assign your values ("Catalog" > "Products").
 Click on the "Features" tab. Find the desired property and click "Expand Fields" or click "Expand / Collapse All" to open all values.
 Now you can add the desired predefined values or add a new value under "Custom Value".

Feature	Pre-defined value	or Customized value	
Ideal für diese Anwendungen:	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Plantas	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Width	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Depth	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Weight	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Multicolour	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>
Compositions	<input type="button" value="Expand fields"/>	<input type="text"/>	<input type="button" value="en"/>

Now the new values should appear on your website.

A look at the layered navigation module

Finally, you can configure the module "Layered navigation".

Front office Features

Layered navigation block v2.2.0 - by PrestaShop

Displays a block with layered navigation filters.

Configure ▼

Under "Filter templates" you will find your existing filter templates and You can edit and then save them.

FILTERS TEMPLATES 1

ID	Name	Categories	Created on	Actions
1	My template 2015-02-13	10	10/06/2017 12:40:13	<div style="border: 1px solid #ccc; padding: 2px; display: inline-block;"> Edit ▼ </div>

+ Add new template

The filter templates give your customers in the FO the opportunity to filter for specific values. For example, your customers can filter by brand, size or material to get the results they want quickly. Select the filters, the filter type and the result limit and save.

YES	NO	Feature: Width (3 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit
YES	NO	Feature: Depth (50 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit
YES	NO	Feature: Weight (5 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit
YES	NO	Feature: Compositions (9 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit
YES	NO	Feature: Styles (8 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit
YES	NO	Feature: Audi-A3 kaross (6 values)	Filter style: <input type="checkbox"/>	Filter result limit: No limit

The result

It should be possible now to choose values on your website and to see the associated products for this values. It's possible to select more than one value and the program shows all matching products.
