

# SBS Product Grid Editor

## Manual

# 1. Introduction

The *SBS Product Grid Editor* is a module designed to simplify bulk editing of product data in PrestaShop.

It allows merchants to update large numbers of products in one clear, spreadsheet-like interface without opening each product separately.

Typical use cases include:

- Quickly updating product prices
- Adjusting stock quantities
- Maintaining EAN codes or supplier references
- Preparing catalog updates for sales or seasonal changes

The module helps you manage your product catalog faster, more accurately, and with minimal effort.

---

## 2. Overview and Navigation

After installation, you can access the module under **Catalog** → **SBS Product Grid Editor**.

The interface consists of three main sections:

1. **Category filter (left side)** – select which product categories you want to display
2. **Search bar (top right)** – quickly find products by name or ID
3. **Product grid** – the editable table where all changes are made

The layout is intentionally clean and intuitive, allowing efficient work even with large catalogs.

---

## 3. Filtering Products

### 3.1. Category Filter

On the left, you'll find a tree structure of all your categories.  
You can:

- Expand or collapse category folders
- Select one or several categories
- Select all or deselect all

The grid updates automatically after you select categories.

### **3.2. Product Search**

The search box on the top right allows filtering by:

- Full product name
- Partial name
- Product ID

Results appear instantly, which is especially useful for stores with hundreds or thousands of items.

---

## 4. Working with the Product Grid

SBS Product Grid Editor Help

Filter by categories

9		Hummingbird printed sweater - Size: S			1200		35,9 € €35,90	42,721 € €42,72	0 € €0,00
10		Hummingbird printed sweater - Size: M			300		35,9 € €35,90	42,721 € €42,72	0 € €0,00

Each row in the table represents a product (or variant), and each column corresponds to a field that can be edited.

Editable fields may include:

- **EAN code**
- **Supplier reference**
- **Stock quantity**
- **Price (tax excl.)**
- **Price (tax incl.)**
- **Wholesale price**
- **Additional fields** depending on future module updates

### 4.1. Editing Values

Click a field and enter the new value.

Navigation works like a spreadsheet: you may use TAB or simply click another cell.

### 4.2. Saving Changes

The **“CHANGE”** button at the end of each row saves the modifications *for that specific row only*.

This prevents accidental mass updates and gives you full control.

---

## 5. Tips for Effective Use

- Save frequently when editing multiple rows.
  - Use filters to reduce the amount of data displayed at once.
  - Double-check frontend changes if prices or quantities are critical.
  - Ideal for daily catalog maintenance or price/stock updates.
- 

## 6. Summary

The *SBS Product Grid Editor* is a powerful tool that dramatically speeds up product administration in PrestaShop.

If you regularly work with large product sets, this module becomes a reliable and efficient part of your workflow.
