

SBS Adressmodifier

Description

Prestashop Addressmodifier module adds "House number" field after "Street" field during order processing. It is inserted before or after the street, depending on the country rule.

Installation

To install the module, go to **Modules > Modules**. Click the "Upload Module" button.

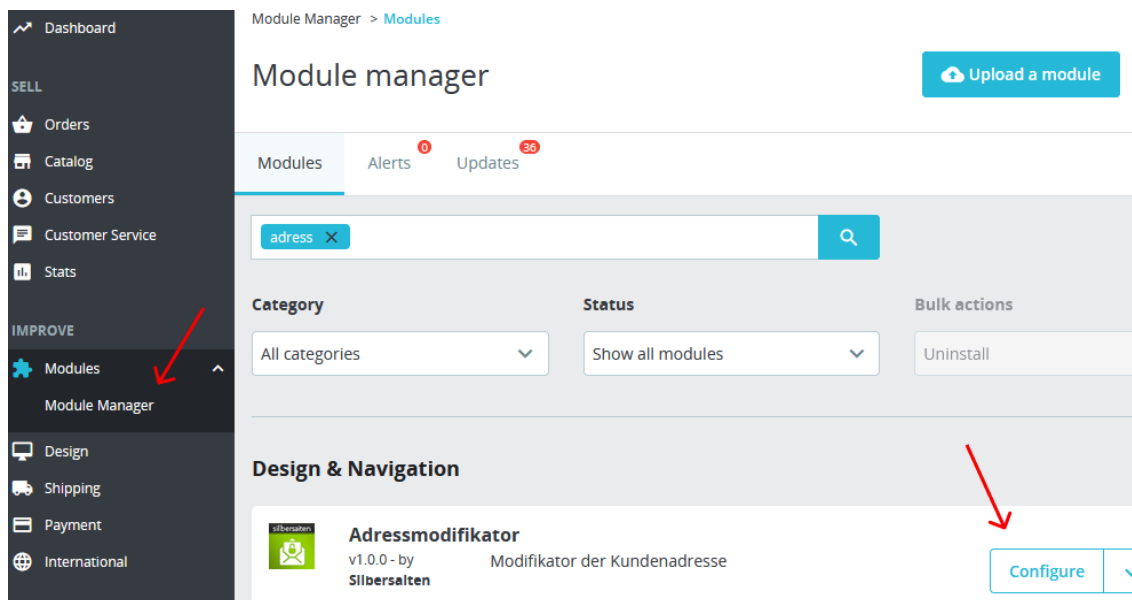

Select the zip. file of the module and click "Load module".

After the module is uploaded and installed, it will appear in your module list.

Settings

To get to the module's settings, click Settings in the module in your module list:

You will then be taken to the entire country overview, where you can select the desired country. To do this, click on a country in the right-hand field and add it. The overview with all the countries you have selected will then appear on the left:

Configuration

Display: Number, Street

221b, Baker Street

Afghanistan
France
Germany
